Seminar **1** Petroleum and Chemical Storage Tanks Construction and Compliance

Highland Tank has been engaged in the fabrication of liquid storage tanks for petroleum, industrial, commercial, and municipal customers for over 60 years.

Our trained staff has a solid agenda beginning with a "primer style" overview of storage tank regulations, followed by a complete products training, and concluding with a full technical specification of typical aboveground and underground storage tank systems including:

- Heating Oil (Commercial & Residential)
- Back-up Diesel/Electric Generators
- Municipal and Privately Owned, Non-Commercial Motor Vehicle Fueling Sites
- Bulk Plants
- Aviation Fuel, Chemicals, and Lube Oil

Seminar **2** EPA Regulations and Oil/Water Separators with Advanced Filtration Systems

Learn how oil/water separators help transportation or petroleum facilities comply with SPCC Plans and help them meet oil discharge limitations under the new NPDES Regulations for Storm Water Discharges.

Learn about the NEW Technologies in Oil/Water Separators!

- Oil/Water Separators for treatment of storm water runoff and product spills using the new Corella® Coalescer technology.
- Advanced Filtration Systems for secondary treatment of hydrocarbon contaminated water.
- Oil and Solids Interceptors for compliance with strict sewer pretreatment regulations.

Seminar **3** EPA Sewer Pretreatment Regulations and Grease Interceptors

Learn about fats, oil, and grease, sanitary sewer overflows, and the NEW Technologies in Grease Interceptors. See how Highland's automatic and passive grease interceptors can help an institutional or commercial kitchen comply with pretreatment regulations prohibiting large amounts of pipe clogging grease that may be discharged from these areas, from entering the sanitary sewer system. Additionally, the seminar provides an overview of the plumbing codes, interceptor sizing, and details on:

- Grease Recovery Units
- Gravity Grease Interceptors
- Hydromechanical Grease Interceptors
- Strainer Baskets
- Solids Removal Systems

Seminar **4** "Green Building" and Rainwater Harvesting Systems

Learn about the new HighDRO® Water Storage Tanks, rainwater and greywater collection and reuse systems, and their LEED impact & benefits. The seminar provides an overview on:

- water resources and protection
- rainwater harvesting methods
- rainwater supply estimation
- harvesting system components, construction methods, operational requirements and maintenance.

Highlights include specifications for code compliant atmospheric (flat or dished heads) or ASME pressure rated tanks with pre-engineered components, factory applied NSF interior coatings, rugged exterior corrosion protection systems, pump packages, controls, and water filtration/disinfection systems.

Lunch & Learn

These "Lunch & Learn" seminars developed by Highland Tank are designed to promote a better understanding of, and compliance with, the current federal, state, and municipal regulations impacting commercial, municipal, and industrial facilities requiring Storage Tanks, Oil/Water Separators & Advanced Filtration Systems, Grease Interceptors, and Water Storage Tanks in your area. These seminars are recommended for engineers, consultants, specification writers, owners and operators for these targeted facilities.

The seminar will provide the latest information on the equipment available, material specifications, and installation/operation techniques for safe aboveground and underground storage and handling of hazardous materials and treatment/reuse of the facilities wastewater prior to discharge. At the seminar you will learn about current EPA regulations including SPCC, NPDES Phase I and II, Sewer Pretreatment, Fire Codes and Regulations, and LEED. Speakers/presenters will be sales managers and representatives from Highland Tank. At the seminars you will receive manuals and handouts, and of course, lunch is on us!

In preparation for your seminar, we invite you to visit our new website at www.highlandtank.com for complete Petroleum and Chemical Storage Tank, Wastewater Treatment Systems, Grease Removal Systems, and ASME Pressure Vessels and Water Storage Tank electronic catalogs. On the site, you can download technical drawings and written specifications on all of our storage and wastewater treatment tank products. There are informative video plant tours of each of the six Highland Tank factories, installation/operation/maintenance instructions, sizing and gauge charts, and regulator links on the new site.

Please check the seminar you would like to schedule

- 1** Petroleum and Chemical Storage Tanks Construction and Compliance
- 2** EPA Regulations and Oil/ Water Separators with Advanced Filtration Systems
- 3** EPA Sewer Pretreatment Regulations and Grease Interceptors
- 4** "Green Building" and Rainwater Harvesting Systems
