potable water tanks

HT-1128

PRODUCT DETAILS

HighDRO[®] Potable Water Tanks (HD-PWT) are an effective and economical way to store potable water for residential, commercial, institutional and industrial installations. These factory-welded and coated carbon steel water tanks are pressure tested for tightness to ensure the quality and dependability of the water supply.

The high-strength, impermeable steel shell combines with our HighDRO[®]-Liner Plus polymer composite water storage liner to provide a flexible, long-lasting tank system.

Highland Tank manufactures HD-PWT for all types of domestic water supplies, such as well water, city-supplied water or delivered water for:

- Schools
- Prisons
- Rest Areas
- Rural Developments
- Livestock Feed Stations
- Emergency Water Supplies
- Hospitals
- Resorts
- Campgrounds

HD-PWT are constructed to the highest standards to ensure a safe, contamination free environment. NSF, UL and AWWA compliant protective linings and coatings are factory applied and form a hard, inert barrier for both the interior and exterior surfaces of the tank to prevent corrosion.

Our interior liner complies with NSF/ANSI 61 Drinking Water System Components – Health Effects for the safe storage of potable water – the nationally recognized standard for all devices, components and materials that contact drinking water.

**Orientation:**

Vertical or Horizontal

Installation:

- Aboveground or Underground

Volumes:

- 185 to 57,500 gallons; multiple HighDRO[®] Tanks may be interconnected to increase storage volume above 60,000 gallons

Diameter:

- 3'-2" to 14'-0"

Length:

- Up to 90'-0"

Maximum Weight:

- 80 Tons

Material:

- Carbon Steel

Head Design:

- Flat are standard
- Flanged and dished, or cone (vertical only) also available

Penetrations:

- Threaded full couplings - up to 4" diameter
- Flanged fittings - 1/2" and up
- Manways - 24" minimum, 30", 36" diameter and custom rectangular manways

Surface Preparation:

- SSPC SP-6, SP-10, SP-5

Internal Linings:

- Epoxy Phenolic
- High-solids Epoxy
- High-solids Polyurethane
- Zinc-Epoxy
- Vinyl Ester
- Rubber, PVC and other sheet linings

External Coatings:

- Primer Paint
- High-solids Epoxy/Polyurethane Finish Paint. Standard color -white. Custom colors available

External Corrosion**Protection System:**

- HighGuard

Testing:

- 5-psi factory air test and seam inspection

Tank Support Systems:

- Horizontal - UL Saddles
- Vertical - Ring Bases & Angle Legs

Tank Accessories:

- Interior ladders
- Waterstops
- Vents
- Exterior ladders w/ OSHA cages & guard-rails; stairs, walkways, catwalks
- All necessary appurtenances per AWWA D100 and NFPA 22
- Water/wastewater pumps and controls
- Gauges

To ensure maximum longevity and optimum use, our corrosion protection systems for underground water tanks comply with UL-1746. Aboveground tanks can be protected with a wide selection of primers and topcoats, even those complying with ANSI/AWWA D102, "Coating Steel Water-Storage Tanks."

Vertical Tank Bottoms

Flat - the most commonly used tanks in the industry; requires a flat surface to give full support.

Dish with Ring Base or Angle Legs - offers near complete drainage; used when head pressure is required at the output.

Cone with Ring Base or Angle Legs - offers complete drainage.
