Propane AutoGas Tanks

Custom Quality in Every Detail

With gasoline prices constantly on the rise, the focus has been put on alternative fuels like never before. One low profile alternative fuel being considered is propane autogas.

Propane is a naturally occurring byproduct of domestic oil refining and natural gas processing. It is 270 times more compact as a liquid than as a gas, making propane highly economical to store and transport. When propane is used as an on-road engine fuel, it is called propane autogas.

Worldwide, there are more than 15 million vehicles using propane autogas, making it the third most common engine fuel behind gasoline and diesel fuel.

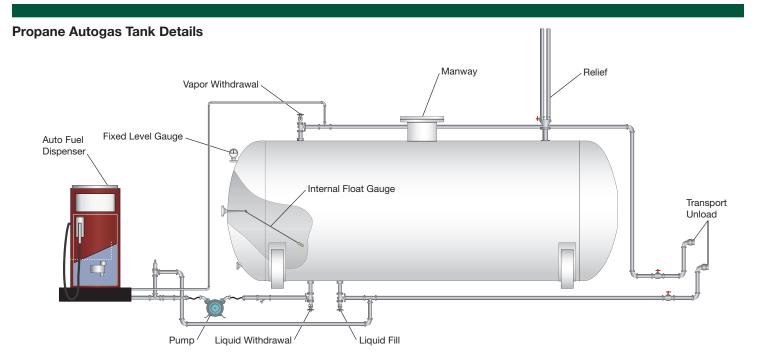

In the U.S., propane autogas fuels about 270,000 vehicles with 2,500 fueling stations found across the United States.

Propane autogas is domestically produced, costs approximately 30 to 40 percent less than gasoline per gallon and does not rob a car of its performance unlike other alternative fuels

With an octane level of 105, autogas will not take the power out of your alternative fueled vehicle. Additionally, autogas burns cleaner than gasoline, which means a smaller carbon footprint. The autogas market is the sleeping giant of alternative fuel, and Highland Tank can help customers get ahead of the curve.

LPG Vessel Sizing Guide

| Volume USWG | Diameter | Straight Shell Length | Overall Length |
|-----------------------|----------|--------------------------|--------------------------|
| 3,900 | 7'-0" | 12'-4" | 15'2" |
| 6,500 | 7'-0" | 21'-17" | 25'5" |
| 12,000 | 7'-0" | 40'-6" | 44'4" |
| 18,000 | 9'-1" | 34'-11" | 39'11" |
| 30,000 | 9'-1" | 60'-3" | 65'2" |
| 30,000 | 11'-0" | 40'-4" | 46'2" |
| 40,000 | 11'-0" | 54'-5" | 60'3" |
| 50,000 | 11'-0" | 68'-5" | 74'3" |
| 60,000 | 11'-0" | 80'-6" | 88'10" |
