## High-LINK® Oil/WaterShield - Wastewater Monitoring Systems

HT-6116

High-LINK® Integrated Systems couple superior steel tank products with state-of-the-art electronic management equipment and proprietary software providing real-time data to optimize any liquid transfer and use operation.

### PRODUCT DETAILS

Wastewater treatment and discharge at many industrial sites are regulated and require monitoring. These applications typically include:

- Airports
- Power generation
- Oil & gas production
- Transportation
- Military & government facilities
- Industrial & manufacturing facilities

These facilities produce wastewater that must be treated prior to being released into the groundwater or sanitary system.

Maintenance and monitoring of wastewater treatment systems demands a unique understanding of the processes and requirements.

Our High-LINK® systems have been engineered to meet those demands with specialized equipment and analytics.

Predictive maintenance and troubleshooting are some of the management tools available with a High-LINK® system.

Reduce system down-time and costly field service with remote monitoring.

#### System Features

- Continuous liquid level monitoring accumulated oil and water
- Enhance security and compliance
- Verify operation and maintenance
- Automatic alert for system clean-out with customizable level alerts
- Reconcile wastewater pump down
- Predictive maintenance tools
  - Reduces down-time
  - Minimize field service calls
  - Save with remote troubleshooting
- Waste hauler verification
  - Volume removed and monitor disposal fees

M E A S U R E • M O N I T O R • M A N A G E

#### Panel Features

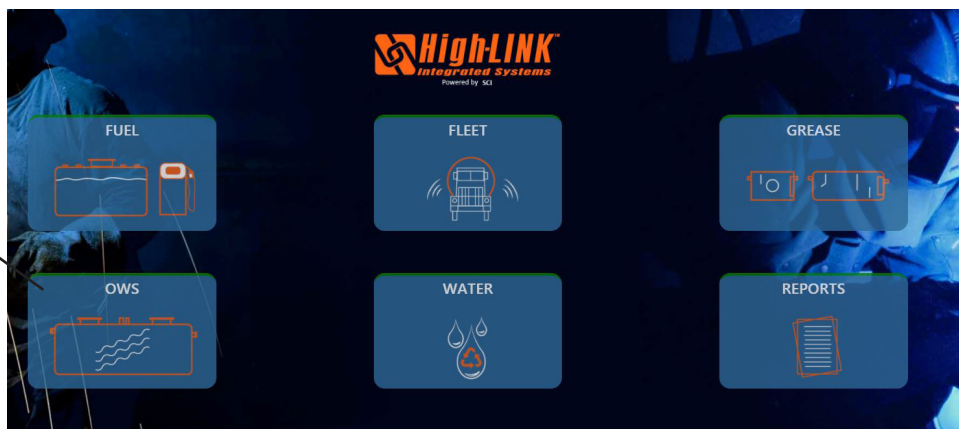

- HMI programmable touch screen
- Customizable set points for high, high-high, and low levels
- Temperature readout
- Interstitial leak alarm
- Local alarm beacon
- Voltage adaptable to site and system requirements
- GPRS, LAN, or Wi-Fi communications
- Standard panel dimensions  
30" x 30" x 10"

#### Optional Monitoring Features

- Pump performance
- Heater Controls
- Valve status
- Flow rates
- Monitor multiple chambers
- Monitor other system components by request

#### High-LINK® User Interface

- Real-time data
- Predictive maintenance
- Active monitoring & alarms
