

TrackShield

HT-6104

Track Shield monitors asset location and activity to improve operations, reduce costs, and limit wear and tear. It also provides data to objectively evaluate asset performance based upon a consistent set of predefined scoring criteria.

Data can be transmitted and viewed in real time over GPRS or stored on-board the device. GPS tracking data can be used for route planning, geo-fencing, and location verification.

Track Shield transmits data every 10 minutes to keep you up-to-date.

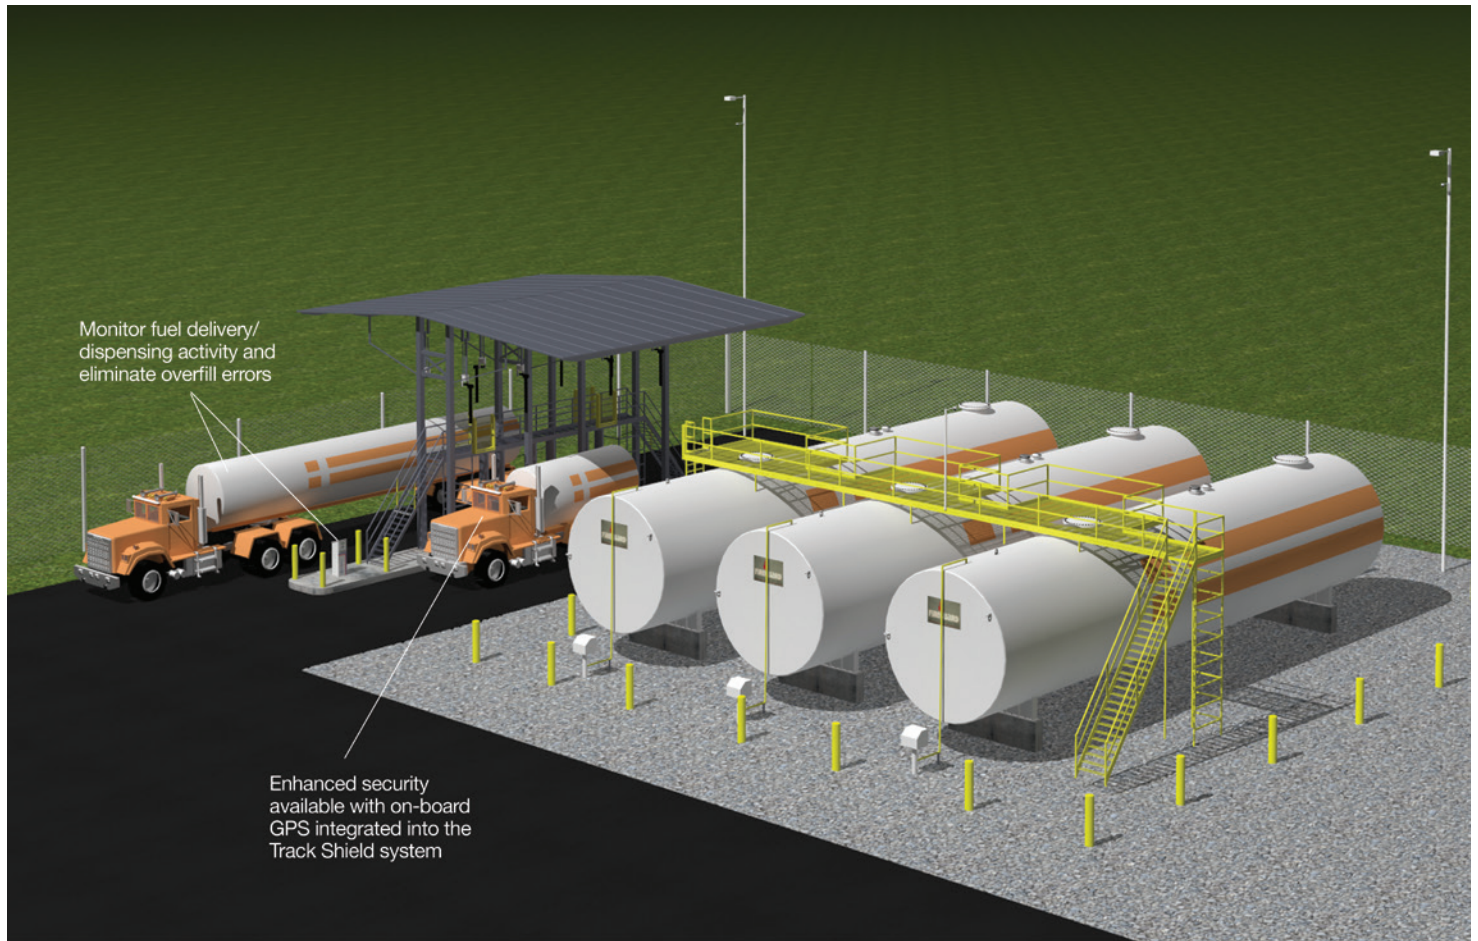

High-LINK® Integrated Systems couple superior steel tank products with state-of-the-art electronic management devices and SCI's proprietary software providing real-time data to optimize usage and transfer of any liquid operation.

System Features

- Wireless remote monitoring allows for volume monitoring, temperature monitoring, and delivery verification
- Prevent fuel waste or theft with RFID that stops pumping the second the nozzle is removed from the tank
- Save time with exact fuel consumption reports for each time fuel is dispensed
- RFID tags provide GPS tank location tracking
- Utilizing solar-powered controllers saves on operating costs

Monitor & Manage

- RFID to authorize filling and dispensing fuel
- RFID tags provide GPS tank location tracking
- Continuously monitor fluid levels in multiple tanks and locations (Fuel, water, etc.)
- Overfill protection
