count on our products. trust in our people.

Enhance security with video monitoring of facilities, equipment and more

**High-LINK®**  
Integrated Systems

video security

HT-6106

**High-LINK® Integrated Systems** couple superior steel tank products with state-of-the-art electronic management devices and SCI's proprietary software providing real-time data to optimize usage and transfer of **any liquid operation.**

Vision Shield uses HD video recording and live streaming to provide around-the-clock security for your liquid and mobile assets.

Vision Shield can be integrated with any stationary or mobile fuel management system, or it can be utilized independently as a video security platform. The system uses state-of-the-art technology coupled with the High-LINK® software platform to customize video security for every user's needs.

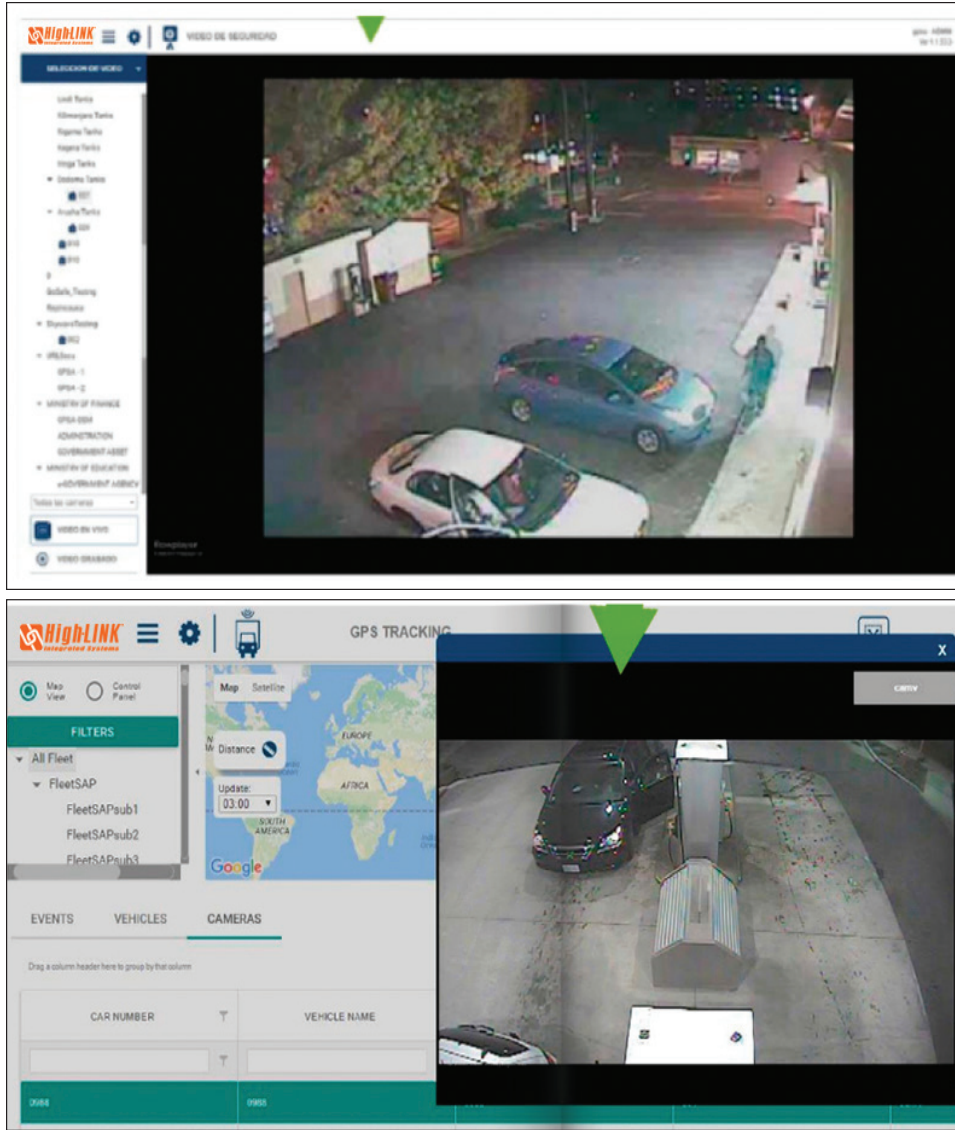

#### Data:

- Stream live video from the High-LINK® software platform
- Record video with high-capacity storage
- Applicable to stationary, mobile, and vehicle on-board systems
- User-defined e-mail or SMS alerts
- Event-driven recording and alerts
- Easily match events with video recording from the High-LINK® software platform

- Fully Integrated with all other systems on the High-LINK® platform
- GPS (optional)

Vision Shield is simple to operate and user friendly. The video feed and recordings can be managed easily from your computer, tablet, or smart phone.

M E A S U R E • M O N I T O R • M A N A G E

## Features:

- Integration of up to four video cameras per recording device
- Bidirectional audio recording
- Integration of up to 16 input sensors with an expansion module
- Integration of two output activation sensors
- Integration of Pan-Tilt-Zoom (PTZ) controllers, enabling remote aiming and focusing of cameras
- Integrated LAN connection
- Support for cellular modems (GSM and CDMA) and wireless communications (Wi-Fi, Wi-Max)
- Built-in router with Ethernet ports for connecting external IP-based devices to the network
- High-quality digital video recording (DVR) capabilities on all channels
- Remote viewing of live and recorded video via PC, tablet or smart phone
- Trans-coding algorithms for video transmission at low bit rates without degrading video quality
- Simultaneous playing and recording of live video from all channels
- Pre-alarm and post-alarm video recording
- Automatic editing of video streams
- Software-generated motion detection with adjustable threshold and regions of interest

## PRODUCT DETAILS

High-LINK® Integrated Systems couple superior steel tank products with state-of-the-art electronic management devices and proprietary SCI software providing real-time data to optimize usage and transfer of any liquid operation. VisionShield is an innovative mobile and fixed video system ideal for monitoring many aspects of your operations.

Digital video recorders that can be installed in almost any type of vehicle uses cellular technology to transmit live or recorded high-definition video.

VisionShield provides enhanced security and live footage to your business operations.

## Vision Shield Specifications

- Allows the use of two-way audio
- Recording capacity in D1 and VGA formats
- Allows event/date/time-driven recording
- Video motion detection
- Solar powered remote configurations are also available.
