

oil/water separation

manual oil interceptors

HT-2510

PRODUCT DETAILS

Manual Oil Interceptors (MOI) are designed to trap sediment and retain free floating oil and grease (petroleum hydro-carbons and other volatile liquids) from wastewater discharged from floor drains such as those found in aircraft and vehicle maintenance, storage and washing facilities. MOIs prevent the discharge of sediment, oil, grease and other substances harmful to the building's drainage system, the public sewer or sewage treatment plant or processes.

Operation

MOIs are installed between the floor drain(s) and the sanitary sewer. The operation of the MOI is simple. MOIs retain wastewater long enough to allow

those contaminants with specific gravities different than water to separate out by gravity. Since oil is lighter than water, the oil floats and can be manually skimmed from the surface of the interceptor.

Conversely, solids settle to the bottom and accumulate at the sludge baffle. The accumulating waste oil and solids are periodically removed and properly disposed.

MOI-SO

MOIs are also available with an integral Side Oil (MOI-SO) waste storage compartment. This simplifies the installation and maintenance of the interceptor system by putting the oil separation chamber and storage tank

in one unit, thus eliminating the need to pipe and vent a separate oil storage tank. This new feature also eliminates any problems with a regulated underground storage tank.

MOI-SO operation is simple: separated oil floats to the surface and then removed via the adjustable oil skimmer into the adjacent oil compartment by gravity. A certified waste hauler can then regularly remove the collected oil.

MOI

MMOI-SO - with Side Oil Compartment

Construction

MOIs are constructed of mild carbon steel and coated with heavy-duty polyurethane for superior corrosion resistance. Stainless steel construction is also available. MOIs are suitable for installation above

or below grade and are available in configurations to fit almost any requirement. Top deck plate covers allow for flush-with-floor installation for easy access for maintenance and cleaning. Vapor-tight quick

opening covers or hinged hatch doors are available as an option. Highland Tank offers an extensive range of standard sizes and capacities. Custom manufacturing and many options and accessories are available.

* Intermittent flow. **NPT 6" and larger - companion flanged connection. Also available with 8" or 10" inlet or outlet. "No-Hub" connections can be supplied for floor mounting or partially recessed installations. **Note:** Vent Connections are 2" or 3" NPT, on outlet end of MOI. Check and advise for local code requirements. Contact your local Highland Tank representative for assistance with the local Authority Having Jurisdiction (AHJ) regulations.
