## **Automatic Grease Interceptors for Sports Stadiums & Arenas**

December 2018

www.highlandtank.com

Fifth Third Arena, home of the University of Cincinnati Bearcats Basketball teams, recently underwent an \$87-million dollar renovation that was completed in the fall for the beginning of the 2018 season.

For the project, Highland Tank built (14) AGI-15's and (1) AGI-100FM connected at the various kitchens, restaurants, and concessions. Highland Tank's Automatic Grease Interceptors offer maintenance benefits to sports arenas and stadiums, as they allow for each individual concession or restaurant throughout the facility to have a singular grease removal device and collection pail.

Some other similar projects Highland Tank's Automatic Grease Interceptors have been utilized on include Cameron Indoor Stadium, PPG Paints Arena, and AT&T Park.
