Highland Tank®

Storage Tanks & Packaged Pump Systems

Skid Tanks

Highland Tank's skid tanks are an excellent solution when portability is required. Empty skid tanks are easily relocated. Skids stabilize the tank and maintain a fixed elevation during movement. Depending on usage, tanks are saddle-stabilized for safety, then securely mounted to heavy-duty skids.

- **Standard steel angle or heavy duty pipe skids**
- **Single and double-wall**
- **185-15,000 gallons**

Lube Tanks

Rectangular single-wall and double-wall lube tanks are designed for economical and dependable storage of bulk lubrication oils and "fast-lube" oil storage. Lube tanks can be installed indoors, in a service bay, outdoors, or next to a building. Highland Tank's lube tanks can be built to fit your space.

- **Welded steel supports underneath for easy installation**
- **120-20,000 gallons**

Bulk Drums

Horizontal bulk drums are practical and economical and conveniently store more product in a smaller footprint than 55-gallon drums, allowing for bulk purchasing. Horizontal bulk drums are ideal when there are height constraints, while vertical bulk drums fit best when floor space is at a premium.

- **Exterior full-fillet lap joints for added "ribbed" strength**
- **Single and double-wall**
- **Integral structural supports**
- **240-2,000 gallons**

A wide array of options and accessories are available to customize and complete any tank installation.

Pump mounts, overflow and spill containment, gauges, and vents can ship with the tank for faster installation.

OSHA compliant ladders, platforms, and walkways provide safe tank top access when required.

Contact us for larger aboveground tanks and all underground tank options.

- [Overfill-Protection tanks](#)

Aboveground storage tanks provide a sensible and safe solution to petroleum and chemical storage.

Highland Tank's steel storage tanks are designed, constructed, tested, and labeled in accordance with the UL-142 Standard for Steel Aboveground Tanks for the Storage of Flammable and Combustible Liquids.

Our aboveground tanks can also be constructed to American Petroleum Institute Standards API 650 (Annex J) Welded Steel Tanks for oil storage and API 12F for crude oil and produced water associated with the gas and oil industry.

**Safe & convenient
fuel dispensing
customized for
every site**

Highland Tank's turnkey fuel dispensing systems are provided with everything needed for proper filling, venting, and dispensing of fuel from a variety of tank options. Designed with multiple power options, tank size, and product storage compatibility, our fuel dispensing solutions are easily customized to suit a wide variety of fueling needs.

Fuel Dispensing Packages

Three dispensing system levels have been engineered as starting points to determine the type of fueling system needed.

Developed for either gas or diesel service, these versatile systems can be customized with the right tank product to exceed your fueling needs.

All pump package systems include:

- Fill-Rite or submersible pumps
- Hose, Nozzle & Swivel
- Mechanical or Digital Meter
- Atmospheric and Emergency Vents
- Level Gauge
- Leak Gauge
- Spill Bowl or Remote Fill
- Overfill Protection Valve
- Pump Suction Pipe
- Particulate Filter and Filter Head

- **Level 1** - Pump and fill port mounted on tank top
 - 185 - 4,000 gallon storage
 - 20-35 GPM pumps
- **Level 2** - Cabinet pump/meter combination or submersible pump with cabinet meter, remote or tank-mount fill port
 - 1,000 - 20,000 gallon storage
 - 20 to 40 GPM pumps
- **Level 3** - Digital dispenser with suction pump or submersible pump, remote fill port
 - 4,000 - 20,000 gallon storage
 - 23 to 40 GPM pumps

Pump systems can be delivered as assembled turnkey units. Limited to 8' diameter tanks.

Always consult with AHJ for specific installation requirements.

High-LINK® Integrated Systems

**Real-time electronic monitoring of fuel,
fleet, and facility operations**

Giving decision makers the information they need — at their fingertips

High-LINK® is cloud-based monitoring and management software that provides in-depth views of day-to-day operations. It includes predictive maintenance tools, extensive alerting capabilities, and automated, customizable reporting features that help users keep an eye on daily operations from anywhere, at any time, on any device.

Fleet managers, fuel suppliers, facility managers, or anyone responsible for the movement, storage, or processing of liquids like fuel and water can benefit from applying High-LINK® Integrated Systems to their operation.

- Save money and increase efficiency
- Analyze data in real time
- Verify physical delivery
- Preprogrammed and custom alerts
- Auto-generated reports
- Customizable reporting

Manage Fuel Inventory and Dispensing with FuelShield & LevelShield

FuelShield is an automated, cloud-based system used to monitor/manage fueling transactions at stationary or mobile installations of retail and commercial fueling sites.

FuelShield is available in a variety of capacities to meet site needs and can be configured to operate as a remote terminal.

- **FuelShield** - Manage up to 8 dispenser points
- **FuelShield-MINI** - Manage up to 4 dispenser points
- **FuelShield-PLUS** - Includes **LevelShield** hardware and software to provide continuous tank level monitoring with all the capability of the **FuelShield**

Pedestal

MINI

- Monitor fuel transactions by vehicle, driver, fuel type, amount, cost, date, and time
- Manage fuel transport, receipt, dispensing, and consumption
- Multi-user interface is secure and convenient
- View entire operation from anywhere, anytime, on any device
