STORMWATER MANAGEMENT

Highland Tank's oil/water separators are designed for a wide range of applications.

Our oil/water separators are unmatched in treating wastewater under many conditions with flow rates up to 6,000 GPM. Our EZ access option permits unconfined access for inspection and maintenance.

These high-efficiency oil/water separators are recommended for use at the following industrial applications:

- Airports & Aircraft Services
- Electric Utilities & Power Plants
- Environmental Remediation
- Industrial Facilities
- Military & Government Facilities
- Municipalities
- Petroleum Production & Marketing Facilities
- Railroad Yards
- Transportation Companies

Our newest oil/water separator video shows how the system works to treat wastewater while also illustrating the features that allow for easy operation and maintenance.
