VERSATILE SYSTEMS CUSTOMIZED FOR YOUR FUELING NEEDS

Fuel dispensing applications range from small skid-mounted fuel tanks to large, fleet fueling operations. Based on fueling needs and tank capacity, Highland Tank can recommend the best fueling package for the site. All packages come complete with the components needed for fueling.

The turnkey packages can accommodate gasoline and diesel blends as well as other fuel types or multiple fuels from multi-compartment tanks. Packages are also equipped to handle a range of fuel dispensing volume - from small tanks to high-volume commercial fueling.

Highland Tank's website features a tool to determine the best pump package based on your criteria. We also offer a complete set of specifications for these packages.

Our fuel dispensing systems are enhanced with High-LINK[®] equipment and software for accurate and secure fuel management.

The High-LINK[®] enhanced fueling systems can verify physical fuel delivery, generate custom reports, prevent theft and tampering, and analyze data in real time, giving users instant alerts.

The 12,000 gallon aboveground fuel storage tank shown here is equipped with an HL-87 package. This package is designed for larger volume installations with meter and dispensing components on the tank head for convenience and accessibility.

measure, monitor, &
manage from your
smart phone

The package includes dispenser, submersible pump, piping, necessary valves as well as conduit and electrical wiring to an explosion-proof junction box. This pump is designed for high-volume fuel transfer.

Standard Features:

- 1" UHF auto nozzle for diesel or 3/4" for gasoline
- Whip hose with breakaway
 - Option of a 15' or 25' hose on a hose reel
- In-line fuel strainer and high-flow fuel filter
- Emergency vent(s)
- Leak gauge
- Clock-style level gauge
- Overfill protection valve
- Atmospheric vent
- Remote fill

Options

- High-LINK® fuel management and level monitoring with the FuelShield Plus
- Canopy
- Canopy light with photocell

Highland Tank also provides support and training for the fuel dispensing systems and software. The customer can make one phone call to get easy answers as questions arise.
