

grease interceptors

Sample Ports

HT-2824

PRODUCT DETAILS

Efficient maintenance and operation of many wastewater treatment systems require sampling outflow for FOG concentration. Highland Tank offers interceptor-mounted, in-line and free-standing sampling ports to enable pretreatment inspectors to collect representative sample of the wastewater being discharged to the sanitary system.

We offer sample ports for both underground and aboveground grease interceptors. These sample ports can also be used on oil/sand interceptors, and oil/water separators.

Dimensions for underground and aboveground cylindrical sample port:

24" diameter x 16" height carbon steel sample port
