This guide is intended to assist knowledgeable personnel with sizing a Highland Tank oil/water separator. The information contained herein is the opinion of Highland Tank. Individual projects must be evaluated to determine the appropriate size and configuration for each site.

When sizing an oil/water separator, there are three primary factors to consider:

- 1 - Treatment Flow Rate
- 2 - Spill Capacity
- 3 - All applicable code & regulations

Please reach out to Highland Tank for further assistance in finding the right oil/water separator for your project.
