

Lunch & Learn

Technical Seminars

Highland Tank[®]

Overview

Highland Tank's Lunch & Learn seminars are designed to promote a better understanding of current federal, state and municipal regulations that affect commercial, municipal and industrial facilities.

Many of these facilities require various storage tanks, process tanks, and ASME pressure vessels. Our seminars are designed to aid engineers, consultants, spec writers, owners, and operators of the targeted facilities.

The seminars will provide the latest information on the equipment available, material specifications, installation and operation techniques for safe storage and handling of hazardous materials as well as treatment and reuse of the facility's wastewater prior to discharge. Some topics covered in each seminar include; Current EPA Regulations, SPCC, NPDES Phase I and II, Sewer Pretreatment, Fire Codes & Regulations, and LEED requirements.

These seminars are applicable across a broad range of industries including:

- Commercial & Institutional
- Data Centers & Communication
- Environmental
- Government/Military/Municipal
- Manufacturing & Industrial
- Oil & Gas
- Petroleum Marketing
- Plumbing & Water
- Power & Utilities
- Transportation

The seminar presenters are certified representatives from Highland Tank. In preparation for your seminar, please visit our website, **highlandtank.com**, for brochures catalogs, drawings, and written specifications for your products of interest.

To sign up for a Lunch & Learn, visit **highlandtank.com/lunch-and-learn**.

Petroleum & Chemical Storage Tanks

This seminar deals with regulations and requirements related to the following storage tank installations:

- Heating Oil - Commercial & Residential
- Back-up Diesel/Electric Generators
- Municipal and Privately Owned Non-commercial Motor Vehicle Fueling Sites
- Bulk Plants
- Aviation Fuel, Chemicals and Lube Oil
- LPG for all types of installation including Autogas, Bulk Storage and Heating

Our trained staff is knowledgeable of steel storage tanks, storage tank regulations and technical specifications for aboveground and underground tank systems.

Highland Tank has been manufacturing high-quality liquid storage tanks for decades and has the knowledge and experience to provide cost-effective, innovative solutions for your projects.

Wastewater Treatment Systems

Learn how Oil/Water Separators help industrial, transportation and petroleum facilities comply with SPCC plans and meet oil discharge limitations under the NPDES Regulations for Storm Water Discharges. This seminar highlights the latest advancements in oil/water separation technology.

- Oil/Water Separators that employ Highland Tank's patented Corella® Coalescer technology
- Advanced Filtration Systems for secondary treatment of hydrocarbon contaminated water
- Oil/Sand Interceptors for compliance with strict sewer pretreatment regulations

At Highland Tank, our team is ready to assist with your wastewater treatment projects and can provide educational tools to help you make an informed decision.

Grease Removal Systems

This seminar provides an overview of plumbing codes and interceptor sizing to help comply with those regulations. Highland Tank manufactures the most extensive line of grease removal systems to treat fats, oils, and grease including:

- GreaseStopper® Automatic Grease Interceptors
- Passive Grease Interceptors
- Hydromechanical Grease Interceptors
- Strainer Baskets
- Solids Removal Systems

Pretreatment regulations for fats, oils, grease and food solids, affect all types of food processing facilities as well as commercial and institutional kitchens.

Our experienced team of trained personnel has the knowledge and depth to provide effective solutions to treating grease issues.

Water Storage & Pressure Vessels

This seminar deals with water resources and protection, rainwater harvesting methods, supply estimation, system components, operational requirements, and maintenance.

Highland Tank provides HighDRO® Water Tanks and Systems to support your LEED initiatives.

- HighDRO®-Pure Rainwater Harvesting Systems
- HighDRO®-Clear Greywater Recycling Systems
- HighDRO® Water Storage Tanks for Fire Protection, Potable Water, Stormwater Detention, Wastewater Storage, & Thermal Energy Storage

Our team has the knowledge and experience to provide cost-effective, innovative solutions for your projects.

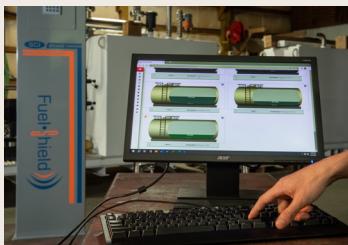

High-LINK® Technologies

This seminar covers High-LINK® technologies as an integrated system that maximizes the efficiency and performance of our tank products. High-LINK® provides a multitude of monitoring capabilities that can be customized to every site.

- Fuel Inventory & Dispensing
- Fleet Vehicle Monitoring
- Wastewater Treatment & Filtration Systems
- Rain or Stormwater Process & Reuse Systems
- Fats, Oil, Grease, & Solids (FOGS) Management

Monitoring trends, benchmarks, and actionable data allows business owners and operators to make informed decisions by presenting predictive maintenance data to minimize system downtime.

Continuing Education

Highland Tank has developed an approved series of technical seminars to help engineers meet requirements for licensure and continuing education.

Topics include:

- Petroleum & Chemical Storage Tanks
- Wastewater Treatment Systems
- Grease Removal Systems
- Rainwater Harvesting System & Greywater Systems
- Thermal Energy Storage Tanks

We can also tailor a seminar to your specific needs. Whether virtual or in-person, each seminar provides one (1) New York State Professional Development Hour. If you are unsure of your state's requirements, please contact us, we'll be glad to assist you.

Highland Tank's Lunch & Learn seminars are designed to promote a better understanding of current federal, state and municipal regulations that affect commercial, municipal and industrial facilities.
